

I do hope that you enjoy working on the Fractal using recursion project. I had lots of fun thinking and creating it for you. By the way, this bad boy was born when I was subbing for a class some time ago on March 12, 2019. Mark that date ...

Be aware of the gist of this lab, you will recursively draw crosses as I will explain in class. Below is what you should get at depth=3

Download the starting code. (74-recursion-cross-fractal)

Have a great day!

Dr DM
